JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Report from Evansville, Ind.—Measles.

Surgeon Stoner reports, May 16:

Three hundred and fifteen cases of measles have been reported since May 1. Three deaths are reported, two with complication. The first case was observed in the latter part of February in a child of a family recently arrived. There were 12 cases reported in the month of February, 30 in the month of March, and 356 in the month of April, which is 10 more cases than has ever before been reported during the same month.

Report from Indianapolis, Ind.—Measles.

Reports received from the board of health at Indianapolis, Ind., show, for the week ended May 5, 690 cases; week ended May 12, 702 cases, 6 deaths. Census population, 169,164.
